Canada still kills

PETITION TO END THE SLAUGHTER OF SEALS IN CANADA

To: Justin Trudeau, Prime Minister of Canada

© HSUS/Brian Skerry

We, the undersigned, are appalled at the continued slaughter of seals in Canada. Almost all of the harp seals killed each year are just pups, three weeks to three months of age. These seal pups already face increasing obstacles to survival due to climate change. Canada must protect them, not kill them. We demand an immediate end to the harp seal massacre.

In the face of worldwide criticism of this slaughter, which has resulted in seal product import bans by many nations, the Canadian government continues to promote, support, and subsidize the slaughter of seals. The government is responsible for the massacre of millions of harp seal pups as well as thousands of grey seals since the year 2000. Whether the slaughter is 'market-based' or the result of scapegoating seals for problems caused by over-fishing, the killing is wrong and must stop.
